Precise Sense™ X-S

Fingerprint reader with swipe sensor

A swipe sensor and smart design makes Precise Sense™ X-S very cost-efficient. The clever design includes a smart guiding rail which makes biometric verification simple. Ideal for large enterprises, the financial service sector, home users and for any organization looking for easy-to-use biometric verification.

Swiping for logical access

Precise Sense™ X-S is a sleek fingerprint reader with a swipe sensor – perfect for accessing computers, networks or cloud services using the simple swipe of a finger.

For enterprises – and home users

Precise Sense™ X-S is optimal for large enterprises, banks and organizations focusing on smart and straightforward logical access. It also fits the needs of home users by using a cost efficient swipe sensor, that enables us to offer you an economical fingerprint reader.

Match-on-Computer or Server

Precise Sense™ X-S is optimized for biometric systems where fingerprints are matched on a computer or server.

Precise Biometrics offers a logon solution for Microsoft's Windows 7 compatible with Precise Sense™ X-S free for download on: www.precisebiometrics.com/logon

Sensor compatibility

Utilizing a TCS4 swipe sensor from AuthenTec (formerly UPEK), the Precise Sense™ X-S can be used directly with any application supporting AuthenTec reference implementations.

The Precise Sense™ family

Precise Sense™ is a family of readers available with various functionalities aimed at addressing different types of user demands and preferences. Available in multiple formats the overall design criteria ensures ease-of-use and stylish implementation, all at an affordable price.

Precise Sense™ X-S

Fingerprint reader with swipe sensor

PRODUCT FEATURES

- Fingerprint reader with swipe sensor
- Easy-to-use 'smart' finger guidance design
- Smart and cost-efficient design
- Optimized for logical access based on Match-on-PC or Match-on-Server

DRIVERS

- Windows XP (32- and 64-bit), Windows Vista (32- and 64-bit), Windows 7 (32- and 64bit; WBF and legacy mode). Microsoft WHQL approved.
- Mac OS X (preliminary Q1 2011)
- Linux

SPECIFICATIONS

General

- Size 100x56x11 mm
- Operating temperature: 0-50°C/ +32-120°F
- USB 2.0 (full speed) compliant
- FCC and CE certified

Biometric Reader

- AuthenTek (UPEK) TCS4 steel coated capacitive sensor
- 500 dpi
- Array size: 192 pixels
